the Silver King of Stockton is accredited with the production of many thousands of dollars in the precious metals in the past, although for some reason the mine has not been permitted to remain idle for a number of years past.

For several months the Silver King of Stockton has been operated under a bond and lease by R. C. Gemmell, M. E., of this city, and his associates, and during this period, even though the work in the nine has been confined to classing out the old drifts, shafts, winzes and stopes, a number of silpments of good pay are have found their way to the Salt Lake market, and when the time arrives when regular mining can be pursued in the handling of this cid producer, in which are miles of old ld producer in which are miles of old oid producet, in which are miles of old workings and enormous stopes, it is believed that the consignments of the precious metals from the mine will be both heavy and regular, the showing at the present time leading to the belief that this period is not more than two months distant.

that this period is not more than two months distant.

W. T. McFarland, formerly of Mercur, is interested with Mr. Gemmell in the Sliver King bond and lenge, and be has charge of operations at the mine with a force of nine or ten men at his command, operations being restricted at the present time to the straightening of the old shaft, which will be retimbered when necessary, and when this work is completed the workings can be pushed on a splendid body of good shipping mineral on the 400-foot level, the ledge at this point being all of twelve feet in width and all pay ore, the rock carrying silver, lead and gold, the gold values being especially encouraging.

values being especially encouraging.

The mine is but a mile and a half from the terminus of the railroad and therefore is easily accessible, and as it is rich in its depositions of the precious metals there is reason to believe that during the coming summer it will be able to find a place on the list as a dividend payer.

MET WITH AN ACCIDENT.

President Woodward Has An Encounter With a Windlass Crank.

President B. F. Woodward, of the Joe Bowers Extension, is congratulating himself over the fact that he is not disfigured for life on account of a little encounter he had with the crank of the windless at the Estella shaft a few days

The Estella shaft is being retim-bered preparatory to the erection of a whim for its extensive development, a which has being in temporary use on the property. On Tuesday of this work Mr. Sodward was standing at the mouth of the shaft and had stooped down to examine the timbering when the windlass handle in some unaccountable on the nose, breaking the bridge and laying the organ over on his cheek. The effect of the blow was paralyzing and Mr. Woodward suffered greatly be-fore reaching Salt Lake, but Dr. Plumwho was called in, patched up the red member, straightening it out, so successfully that outside of a with such a serious accident. The Estella shaft, which is about

go to the deep in the exploration of this lode, in the upper drifts of which some time bedles of high-grade ore were left by former operators years ago.

At the main workings of the Joe Bow-ers Extension, which will soon be embellished by the erection of a steam hoist, which has arrived in the camp, a foot of solid high-grade ore is show. a foot of solid high-grade ore is showing on the footwall side of the ledge on the 200-level, the mineral being gray capper and galena, samples of which, it comparison with the shipping roof from the Joe Bowers mine, can hardly separated, so similar is the ore fro

Ore shipments from the Joe Bowse extension will begin soon after the ne oist is in place.

THE PHOENIX OF BINGHAM. Lower and Middle Tunnel Connecte

By a Winze. It is now believed that the Phoen

mine of Hingham will soon drop int line as a heavy producer of the preciou meinls, and Manager Gebhardt is high ly claim over the splendid showing in this prospective bonanza, which, i years past, has made a record as a dividend-payer.

For the past few months work has

For the past few months work has been pushed in this property in the making of an upraise from the lower to the middle tunnel, and the connection was made only a few days ago, but with the completion of this work four bodies of fine ore are placed within easy reach and can be drawn upon at any time new for shipments. In the new upraise the showing is exceedingly flactering, as, at a distance of fifty feet from the lower tunnel, a five-foot solid body of good shipping ore has been exposed, and with development this body is gaining in size, the indications being that the deposit is well-nigh inexhaustible, and kir. Gebhardt says that with only a force of ten men be can take out ten tons of high-grade stuff daily without any difficulty, the intention of the company being to make a record from now on of from 20e to 50e tons of ore monthly, which will find its way to the valley smelters, and with this output it will not be long before the association will be able to resume the payment of regular monthly dividends.

The outlook for Bingham was never better than at the present time, and

The outlook for Singham was never better than at the present time, and this grand old camp will doubless forge to the front in splendid style this coming spring and summer.

better than at the present time, and this grand old camp will doubless forge to the front in splendid style this coming spring and shummer.

GATLING GUN BURSTS.

The U. S. Fraction lode, Camp Floyd district, by P. S. Booth.

New Cast Steel Ordnance Proved to Be Unsafe. New York, Jan. 5.—The Herald says:

ing company will hold a meeting in likely to revolutionize coast defense ar-

electric button. Pieces of the gun flew in all directions, about the walls of the shelter, but no one was injured.

Coalville, Jan. 4—The pumps, track and all tools, cars and other implements have been taken out of the Hopkins coal mine, and the mine closed upindefinitely. The immediate cause is not made public, but the prevailing idea is that the increase of writer and rock in the coal is the theory most probable.

Fire at the Ross.

(Special Correspondence?)

Stateline, Jan. 1.—A few days ago a fire occurred at the Ross mine, in Eagle Valley district, the cabin of Messrs, Rafferty and Hinch being burned to the ground with all of their provisions and supplies the loss being estimated at \$200. Rafferty is an employee at the Ross mine, while Hinch is engaged in prospecting.

electric button. Pleces of the gun flew in all directions, about the walls of the walls of the walls of the wall in all directions, about the walls of the shelter, but no one was injured.

Cleveland, O., Jan. 5.—Concerning the bursting of the big eight-inch Gatling gun at the Sandy Hook proving grounds, which was built at the Ots Steel Works in this city Manager Bartole of the latter company said today.

The gun was built according to specifications and instructions furnished by Dr. Gatting, and was, of course, an experiment. The fact that the gun experiment in had been fired a number of times with 150 pounds of powder and 250 pounds of projectiles, does not necessarily mean that Dr. Gatling and experiment that Dr. Gatling and experiment that Dr. Gatling and experiment that the contract of times with 150 pounds of powder and 250 pounds of powder and 250 pounds of powder and 250 pounds of powder with the first built gun, and if another is made, which will be probably the cone, the defect will probably be overcome.

Piles Are Universal.

One person in every four has some form of rectal trouble. Remedies that will relieve are plenty, but there

north with 100 passengers, all from

trouble with its attendant aches and pains, now she is well. Here

New York, Jan. 5.—Nolable gains were recorded in the specialties and some of the railways today. The announcement of gold engagements of a million and a halt overcame the reactionary tendency of the foreneon and set the market forging upward, which continued to the close. The conditions of the exchange and money market do not seem to warrant the expectation that the import of gold will be a sustained movement, the theory beging that our large balance of trade would not be drawn upon largely while money can be issued at more profitable rates abroad.

not be drawn upon largely while money can be isomed at more profitable rates abroad.

A lower range of London prices gave a declining tendency to early transactions here. Manipulation of the specialties, Tobacco, Brooklyn Transit and People's Gas, gave better tone to the radiways, but on profit-taking there were some very substantial leases. With the announcement of the gold imports in the afternoon the boils had their own way, and especially in Mainhattan, General Electric, Broakfyn Transit and Colorado Southern. The radiway shares moved ruther sluggishly until late in the day, when an active demand arcse for Louisville, Rock Island and the Southwastern group, excepting Texas Pacific, which broke bally in the old, en the publication of a report that Manhattan was to be electrically equipmed by General Electric, the stocks, which had each advanced five points, presumably on early information of the reported deal, receded sharply on profit-taking. Late in the day it was said that while the contract to equip Manhattan electrically had not been given, confidence had been expressed by isoneral Electric hipersets that they would get the contract.

The bond market was under pressure during the forenoop, but in the late session heavy purchasing orders were distributed, which carried the level of prices above yesterday's close and imparred a strong tone generally. Total sales 5,565.-600, United States new is coupon reacted 4 and the old 4s registered advanced 4 in the bid price.

Total sales of stocks, 915,700 shares, in-

LYNCHING IN ALASKA.

Notorious Saloon-kesper Hanged By
Vigilance Committee.
Vancouver, B. C., Jan. 5.—The
steamer Rosa je has arrived from the

ling for the Tonquin loan. There is also talk of dearer money. Americans opened heavy on profit-taking, here. New York bought little and the close was depressed, except for Omiario & Western, in which there was good buying here and from New York. The feeling here is that the market will pause until 1889 prospects seem clearer. Coppers were dull on the Paris tone. Money was easy, £175,000 gold being taken for shipment to America and £5,000 arriving from Australia. The price has relaased to 75s 10 d. The Bank of Bengal has raised its discount rate from 6 to 7 per cent.

Imports of Gold.

New York, Jan. 5.—Lagard Freres have engaged \$1,09,000 in gold of London for importation to the United States. Multer, Schall & Co. have engaged \$500,000 in gold for import, This makes the total for today \$1,500,000.

Loans, Exchange, and Silver. New York, Jan. 5.—Money on call, steady, at 25.863 per cent; last loan, 23. Prime mercantile payer, 30.34 per cent. Sterling exchange, steady, with actual business in bankers bills at 4.84 64.805 for demand and at 4.814.64.805 for sixty days; posted rates, 4.82.564.805. Commercial bills, 4.864.64.814. Silver certificates, 23.56605; bar silver, 33. Mexican dollars, 465.

The Metal Markets.

The Metal Markets.

New York, Jan 5.—Tim took another leap today, advancing 39:29 points with the tendency at the end of the session toward a still higher level. The other departments showed pronounced strength in sympathy, though improving in less rapid form. Demand was brisk all day but sellers were hard to find a geauine buil fever prevailing. Reports from the milnes and abroad reflected corresponding changes, with the outlook in all directions very bright.

At the close the metal exchange called pig fron warrants strong at 8:06 neminal.

Lake Copper—Strong: 13:36 bid, 13:36 asked.

About Catarrh.

It is caused by a cold or succession of colds, combined with impure blood. Its symptoms are pain in the head, discharge from the nose, ringing noises in the ears. It is cured by Hood's Sarsparailla, which purifies and enriches the blood, soothes and rebuilds the tissues and relieves all the disagrecable sensations.

Hood's Pills cure all liver ills. Mailed or 25c. by C. L Hood & Co., Lowell,
